VERITAS™

Solutions for Data Protection and Storage

ThunderCat Technology, in partnership with Veritas, offers solutions to address the unique and complex data protection challenges of federal agencies – and can ensure your IT needs are met with the dollars you have at the end of the fiscal year. Set your agency up for success in FY 2021 by leveraging your *"use-it-or-lose-it"* funds on an effective, proven approach that addresses data complexity via one holistic platform.

VERITAS SOLUTIONS: NETBACKUP

ThunderCat Technology is authorized to distribute Veritas solutions to government agencies.

Veritas' NetBackup software is the leading choice of organizations globally as the front end of the data protection workflow.

Offers unrivaled data protection

Protects up to 600 types of workloads

Reduces costs and complexity

ROTs RPOs
Mitigates business and mission risk

Do you have a small environment and a limited budget?
Backup Exec: A fast, cost-effective, unified backup and recovery solution to protect data wherever it lives—virtual, physical and cloud. Deployable marketplace templates for both AWS and Azure & certified cloud connectors for all major cloud vendors.

Are you an existing Veritas customer waiting to leverage your existing technology to deploy a virtual environment?
NetBackup Virtual Appliances: Data protection for remote offices to the cloud in virtualized environments.

A complete list of SKUs is available at: thundercattech.com/veritas-FY20
